Allowable Subject Matter

Claims 1-9, 11-13, 15, 16, 23, 24, and 26-34 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record fails to show or render obvious a method for a controlled release of structures comprising: forming one or more trenches in a layer of device material, filling one or more selected trenches with an etch-stop material to form one or more etch-stop trenches, defining one or more structures between the selected trenches, forming a structural layer proximate one or more exposed areas of the device layer, and etching one or more portions of the device layer between the etch-stop trenches to release the structures, wherein the etching does not etch the etch-stop material, wherein the structural layer includes one or more structures that are formed directly on top of an etch-stop layer.

Regarding claim 16, the prior art of record fails to show or render obvious a process for forming structures comprising: forming one or more trenches in a layer of device material; filling one or more selected trenches with an etch-stop material to form one or more etch-stop trenches; masking a surface the layer of device material to expose one or more selected areas of device material that border one or more of the etch-stop trenches; and forming one or more structures on one or more of the selected areas of the device material that were exposed; and etching one or more of the selected areas of the device layer to release the structures, wherein the etching does not etch the etch-stop material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
